

Find the Lie

There are lots of amazing facts about animals. Pick an animal and research it on the internet or in a book. Write three facts about your animal. Make two of the facts true, and one of them a lie! Then read your facts to your friends. See if they can pick which one is the lie. Can you pick which fact is the lie for each animal?

Koala

- A. Is a member of the bear family.
- B. Its name is an Aboriginal word meaning 'no drink.'
- C. It eats between 500 and 1000 grams of gum leaves a day.

Giraffe

- A. On average an adult male is 5.5 metres tall.
- B. Males fight by kicking each other.
- C. They have seven neck bones, just like us.

Crocodile

- A. Have over 100 teeth.
- B. Have strong acid in their stomach to digest bones.
- C. Temperature of their eggs determines what gender they will be. If they're hot or cool the babies will be females, medium temperature produces males.

Write your two facts and a lie in the space below -

Lies were
Koala - A. Giraffe - B. Crocodile - A.
