

## ***Hard Working Camels***

Working camels carried loads anywhere from 240 to 600 kilograms. It's no wonder they're called the ships of the desert! Research and find out how much of an object a camel could carry. Then write your findings in a sentence.

A tin of Milo weighs 500 grams. A bull camel could carry the equivalent of 1200 tins of Milo.

I weigh 60 kilograms. A bull camel could carry 10 of me. A camel that could carry a 240 kilogram load could carry 4 of me.

Our school shot put weighs 2 kilograms. A bull camel could carry 300 shot puts!

Write your sentences in the space below. You can illustrate them if you like.
