

## ***Invent!***

Pretend you are a famous inventor like Slim-Pickles and Jolly. You are going to do some inventing! Think of a problem such as -

- I can't get out of bed in the morning.
- I don't have time to do my homework.
- I can only fit two flavours of ice cream in my cone.

Think of an invention to solve the problem. If I chose 'I can only fit two ice cream flavours in my cone' I could invent a bigger cone, or a machine that squishes ten flavours into one scoop of ice cream or I could change the shape of the cone to fit more flavours. Time to do some inventing!

My problem is \_\_\_\_\_

\_\_\_\_\_

My machine is called a \_\_\_\_\_

It looks like

It will work by \_\_\_\_\_
