

Make a board game

Use the information from *Hoosh! Camels in Australia* to make your own camel themed game. Your game could be a board game with squares like - Find water go forward three spaces, camels load is unevenly packed miss a turn, hobbles have broken and camels have wandered off go back three spaces.

Or your game may be a test of camel knowledge. You could ask questions to a group of people. Each correct response earns a letter from the word camel. The first person to spell camel is the winner.

Remember when designing your game -

- Be creative. The more enjoyable your game is the more people will want to play it.
- Write clear rules. People should be able to read the rules and know how to play your game without you saying anything.
- Make your game colourful.
- Include lots of camel information.
- Have fun!
